Disassembly Process

Assembly Process

During every Cot Grinding cycle, Top Roller assembly needs to be disassembled to take out both Top Rollers for grinding. These steps have to be repeated to reassemble, after the Top Rollers have been ground to exact size.

ADS 200 does this Job-Repeatedly & Accurately, Every time.

- Fully Automatic operation.
Operator only has to dock & undock the trolleys
- Capacity to Disassemble/Assemble up to 200 sets per hr.
- Fast & Accurate
- No damage to expensive spinning components
- No operator fatigue / boredom due to repetitive jobs
- Minimum man intervention
